

Public Space Safety Specification Checklist

Ensure your project is compliant, inclusive, and protected. This checklist covers core safety product categories — a

Stair Nosings

- Stair nosing insert contrasts with stair tread by at least 30 LRV
- Slip-resistant insert selected (e.g., PVC, Carborundum, Rubber)
- Profile matches flooring material (tile, carpet, vinyl, etc.)
- Correct fixing method for substrate (screw-fixed / adhesive)
- Meets DDA / Building Regs Part M guidance

Tactile Paving

- Blister paving for crossing points/platform edges
- Corduroy paving for top/bottom of stairs or hazard areas
- Stainless steel or durable resin material specified
- Installed to DfT-recommended layout and spacing
- Good LRV contrast with surrounding surfaces

Wall & Corner Protection

- Corner guards placed at 800mm–1200mm height
- Material suits usage (PVC for general / aluminium for commercial)
- Fire-rated/hygienic finish for medical or transport settings
- Fixed flush to avoid obstruction or damage

Final Notes

- All products sourced from approved UK supplier
- Visual contrast considered across all surfaces
- Fixings, adhesives and transitions are spec-appropriate
- Technical datasheets reviewed and filed
